The most rugged high-performance embedded parallel optics

LightABLE for Datacom & Telecom

Onboard 150 Gbps embedded optical module for high I/O density

The LightABLE optical embedded optical module is a chip-size parallel transmitter/receiver featuring the lowest profile surface mount package in the industry. The LightABLE enables high I/O density and alleviates space and power challenges facing system designers today.

40Gbps LightABLE SR4 LM Series Optical Transceiver

SpaceABLE SM 50G and 150G

QSFP28 40G and 100G

High-performance parallel optic module

SR4 50G

Radiation-resistant optical transceivers

Optical Tester
